

FORD TRANSIT

FRONT WINDSHIELD COVER

What's Included:

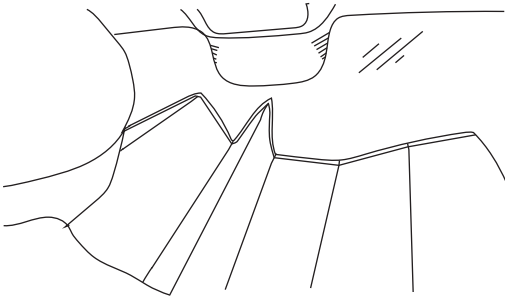

Front Windshield Cover

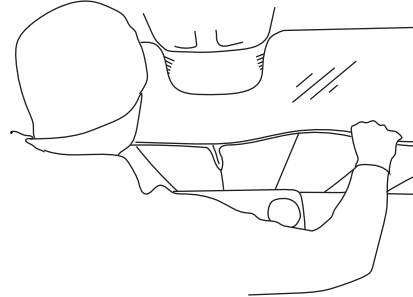

Storage Sack

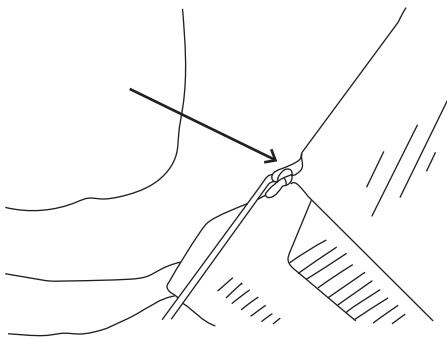

1. Unfold your window cover on your van's dashboard with the VanEssential logo facing inward. The window cover may be stiff, but will soften over time.

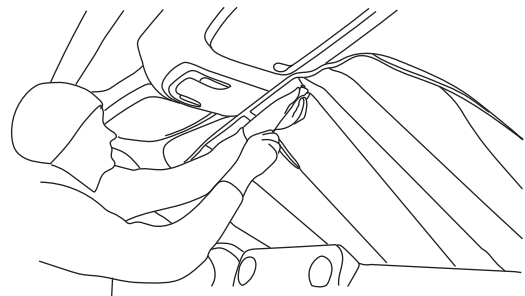

2. Push the window cover down so it rests where the windshield meets the dashboard. Make sure the window cover is centered across the length of the window.

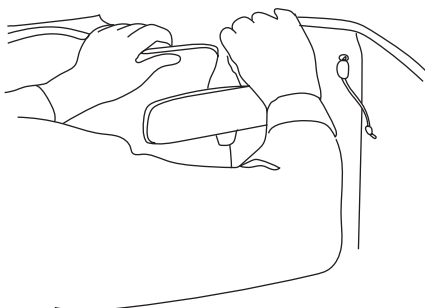

3. Locate the two hooks at the top center of your window cover. Attach the hooks under the headliner.

4. Once hooked, pull the drawstring to secure the window cover in place.

5. If your van has a rear view mirror, lift up the window cover and wrap it around the mirror one side at a time. Use magnets to close around it.

6. On the driver's side, press the edges of the cover into place, and pull the sun visor down to hold the cover in position. Repeat for the passenger side.
